

PSU-100

Power Supply Unit

- 7.25 Amp switch mode power supply designed to power RDC's D-20 & C-20 base stations and repeaters.
- Suitable for charging 18A/h to 40A/h 12V lead/acid batteries (not recommended for 7A/h batteries).
- Battery polarity protection fuse.
- Battery low protection.
- Short circuit, overload and over-voltage protection.
- Provides sufficient power to simultaneously supply a D-20 or C-20 unit and charge a depleted battery.
- Will restart charging without physical intervention after an extended power failure has discharged the battery.

LED INDICATIONS

- Green LED on** 12V DC present to Molex connector.
- Red LED on** Battery voltage below 11V.
- Red LED off** Battery voltage normal.

8-Way Molex connector on RDC D-20 or C-20 base stations or repeaters
